Attendee Options

Full Day	Get all the benefits of a full day of education on DB2 and SQL. Attendees get a LISUG educational certificate.
Evening Only	Can't get away during the day, join us after work. Pricing is for a regular dinner meeting, but you also get the vendor expo, raffle and panel discussion.
Executive Track	Provides focused activities and topics for IT Executives. Start with the Vendor Expo at 5:15pm, continuing with the Networking/Cocktail Hour, Dinner/Panel Discussion and an Executive focused after dinner topic.

Schedule

- 12:30 pm Registration/Vendor Expo
- 1:30 pm **!! BONUS SESSION - Steve Fier on Power8 and IBMi V7R2!!**
- 2:00 pm DB2 for i - What's New
- 3:15 pm Break/Vendor Expo
- 4:00 pm SQL Stored Procedures and Functions
- 5:15 pm Vendor Expo/Raffle
- 6:00 pm Cocktail/Networking Hour
- 7:00 pm Dinner and Panel Discussion – Trends in IT Security
- 8:00 pm DB2 & SQL Security
- 9:30 pm Meeting Concludes

Speaker/Topics

Rob Bestgen is a lead architect working in the heart of the IBM i development lab in Rochester, MN. As chief architect of the DB2 SQL Query Engine (SQE) for DB2 for i, he has directed the team in providing SQE's numerous industry leading capabilities. Rob is also product manager for DB2 Web Query for i, the popular IBM i product for query reporting and analytics. He is a frequent presenter at customer briefings and customer conferences both domestically and internationally.

DB2 for i - What's New

Find out how the latest DB2 features can be leveraged to help your IBM i databases and applications take a big step forward. You will learn how these new DB2 features, such as advancements in the integration of SQL & RPG, support for XML, transparent column encryption through column level exits, Hidden Timestamp columns, and other enhancements can be used to improve your applications and reduce your development time. In addition, the session will cover several new functions that DB2 has added for v7.1, and even v6.1, in the last year. All this and more DB2 for i capabilities will be covered.

SQL Stored Procedures and Functions

Support for SQL Procedural Language (SQL PL) in IBM i has become instrumental in application modernization and porting projects. The procedural language can be brought to bear in many different aspects of database processing. In this session, we provide an overview of the SQL procedural language and describe the major areas in which it can be used: procedures, functions and triggers. This session will also highlight recent advancements in SQL PL as well as performance tips.

DataBase Security. Not Just for the Other Guys

When a business is 'hacked', it means data is stolen or destroyed. That means data has value, and indeed it does! Data is an asset, even though it is not (yet) on the financial books. Every company has it. Often data is the most valuable asset a company has. This session discusses the importance of data, distinguishing between different types of data, the many ways data can be breached and how to protect it.

Panel Discussion – Trends in IT Security

		
Patrick Botz	Mark Weiner	Christopher Cassar
Pat Botz is the principal consultant and founder of Botz & Associates, Inc. and an IBM Systems Magazine technical editor. Pat was part of the OS/400 OS development organization as a member of the system security team. Pat was the system security team leader and was the lead OS/400, i5/OS and IBM i system security architect. Pat is also the author of numerous trade press articles and a co-author of the book "Expert's Guide to OS/400 and i5/OS Security." In addition, he is a worldwide speaker on various platform specific and general security topics.	Co-founder and Managing Partner of Reliant Security. He has worked with a number of retailers, payment processors and card brands, architecting payment solutions and associated PCI DSS security controls. As a former QSA and early QIR, Mr. Weiner founded Reliant when he could not find suitable systems integrators to assist his clients in achieving PCI DSS compliance. He was an early pioneer in driving practical, cost-effective implementations of security and compliance requirements. An engineer by trade, Mr. Weiner has Bachelor of Science and Master of Science degrees in electrical engineering.	Founder of CMC Forensicworks / CMC Dataworks Inc., an IT consulting company. His roles include Senior partner and Chief Forensic technician, which includes all aspects of gathering forensic data as evidence, providing analytics and testimony in forensic investigations of digital data and producing reports and exhibits related to forensic cases. His company offers other services as well such as MS Exchange and Active directory administration, email hosting and implementation, general project management, website development and maintaining technical documentation.

Bonus Session – Steve Fier, IBM Power Platform Leader, will present recent IBMi announcements including IBMi V7R1 TR8, V7R2 and Power8 servers.

Vendor Expo – The Vendor Expo will be open during registration and breaks. Vendors will provide information and product demonstrations of importance to LISUG members.

Event Journal – The Journal is your guide to the event's activities and yearlong reference for the sponsors and vendor expo participants that support this event.

Information Table – Sponsors distribute collateral materials (brochures, CD/DVD's and vendor logo'ed items) at the Sponsor Information Table.

<u>Attendance Options</u>	<u>Starts</u>	<u>Member</u>	<u>Non-Member</u>
Full Day	1:00pm	\$125	\$150
Executive Track	5:15pm	\$ 65	\$ 85
Evening Only	6:00pm	\$ 65	\$ 85

Prices are for payment at registration – cash or check. You can pre-pay online using Paypal and receive a \$10 discount. Registration and prepayment are on the LISUG website (www.lisug.org).

FUN, FUN, FUN!!! - Spend a day with your LISUG colleagues learning some new skills and catching up with them. There will be raffles and other surprises to make this a memorable experience.
